# DIMENSION PRO

MANAGE YOUR BUSINESS SUCCESSFULLY...

Dimension Pro allows you to effectively manage your retail and wholesale business. A flexible Microsoft Windows software package that provides total in-store control of your Avery Berkel system scales.

Designed for ease of use by the end user and enables information entry, order processing, reporting and is the direct replacement for your carbonated books.

DIMENSION PRO
MANAGE YOUR BUSINESS SUCCESSFULLY...

Product Maintenance

Easily change; prices, cost prices, use by dates, barcodes, promotions, cooking times, cooking instructions and more. Use our unique recipe builder for ingredients. You can make recipes for products and then assign multiple recipes to many products. You can also assign percentages to the ingredients as well. All the allergens are automatically bolded, saving you time and effort.

Seamless Integration

This unique package uses market leading communications software, Avery Berkel MXAPI which allows Dimension Pro to seamlessly update your Avery Berkel scales.

Stock Control

A complete inventory management solution for your weighed and dry goods. Dimension Pro automatically generates purchase orders to your specified suppliers. Returns and wastage can be put directly through Avery Berkel scales giving your business the complete stock management solution.

Report Centre

Dimension Pro offers flexible reports including items sold, number of customers, sales achieved, product groups and many more. Other data reports include stock reports, production sheets, invoices, customer accounts statements and payment activity, suppliers reports, etc.

Wholesale

A key point of Dimension Pro is the ability to receive an order from a customer. Then produce production sheets, process the order through the Avery Berkel scales and receive an invoice ready to print at your PC. The invoice is tailored to the customer's individual price list.
Customer price lists can be created and tailored to either a category of customers or to the individual account.

OrderIQ

OrderIQ is an app that can be given to chefs and other business to business customers. The user can place orders through the app on their Apple or Android Phone. Once they have done this they will receive an order confirmation. You will then receive their order in Dimension Pro. This saves phone calls, emails and any other forms of communication.

ToGo

Togo is our app for taking customer orders in a retail shop. When a customer wants to place an order for the weekend or even Christmas. Log on to the app via a web browser on any web enabled device. Then select the items the customer wants. Once this is done, fill in the customers details and use their email address as they will receive an order confirmation. Their order is now in Dimension ready to be prepped.

ProGo

ProGo is our own app that can be used for processing orders without the need for using a scale. You use our Rugged PDA that has a barcode scanner on it. All you need is your products to already be labelled with our unique QR code or standard EAN barcode. You can select the order on the device and simply scan the packs to that order. Once you have scanned all the items the order can be completed. Then the order is sent back to dimension completed, delivery notes and invoices can then be printed off.

WooCommerce

Connect Dimension Pro to your WooCommerce website to maintain product information and receive all of your orders in one place. With this connection you can manage all of your products from Dimension, rather than learning a back end of a website. All of your web orders will come directly into Dimension, rather than emails or notifications from the website. This makes forecasting stock much easier across your whole business. Once you receive your web orders you can print a handy preparation report and then start packing the customers order.

DIMENSION PRO unique points

- Multi scale and multi site networks
- Transactions collected automatically by built in scheduler
- Can export invoices to Sage, Xero and QuikBooks
- Counter Ticket integration with the following brands Symeyo, Edikio and Magicard.
